Quiz & Worksheet - Comparing and Ordering Decimals | Study.com

Here is a power point I use to teach ordering and place value for decimals. The starter sheet is linked to the power point. I print out these and give each sheet to a person in the class. Then I ask them to order themselves - there are 5 questions here with the first being ordering words - the remaining 4 I do after completing the powerpoint.

### Numbers: Decimals - BBC Teach

These ordering decimals worksheets have lists of numbers given with decimal places which children need to write out in ascending order of size - i.e. from smallest to largest. All the questions in the worksheets below have numbers given to 3 decimal places. 2.268 2.270 2.369 1.379 2.277 = 1.379 2.268 2.270 2.277 2.369.

### Ordering Decimals - 3dp Worksheets - Free Printable PDF

When you put decimals in order, first compare the whole numbers, then the tenths, then the hundredths and then the thousandths. Unlike the numbers you are most used to, the value of numbers after decimal points goes down instead of up. That means that 0.099 is worth less than 0.1 - 1 tenth is more than 0 tenths, 9 hundredths and 9 thousandths.

### KS3 Numbers | Learn to Compare and Order Decimals

To order fractions and decimals, you can either write them all in the same form and then compare them, or place them on a number line. Recall that numbers increase in value as you move from left to...
