A behavior occurs--whether an example of humans at our best, worst, or somewhere in between. What went on in a person's brain a second before the behavior happened? Then Sapolsky pulls out to a slightly larger field of vision, a little earlier in time: What sight, sound, or smell caused the nervous system to produce that behavior?

Behave is at once a dazzling tour and a majestic synthesis of the whole science of human behaviour. Brought to life through simple language, engaging stories and irreverent wit, it offers the fullest picture yet of the origins of tribalism and xenophobia, hierarchy and competition, morality and free will, war and peace.

Behave: The Biology of Humans at Our Best and Worst by neuroendocrinologist Dr. Robert M. Sapolsky is a really long book at 800 pages. It is something truly impressive: a single attempt to comprehensively document the totality of scientific knowledge of human behavior at this point in history. When viewed from this perspective, 800 pages suddenly seems inadequate.

There has never been a better time for Robert Sapolsky's Behave: the Biology of Humans at Our Best and Worst to appear. For those as perplexed and conflicted as me about such seismic political events as Brexit and the election of US President Donald Trump, the book helps not only to tease apart the factors that can lead people to behave in ways that seem to make no sense, but also to explain our own reaction.
