**How to Install a Car Amp - Installing a DIY Car Amplifier**

This diagram shows the layout of a common car audio system and signal flow. The dotted black line shows the path of the preamp audio signal (before it's amplified), from a head unit, through an equalizer and electronic crossover and to the amplifier. A video signal is also sent from the head unit to a pair of video screens in the back seat area. From the amplifier, an amplified audio signal (the solid black line) goes to each speaker in the system – one amplifier powers a subwoofer.

Equipment: SC4 Signal Converter, D4.100 4 Channel Amplifier and E Class Component and Coaxial Speakers. Price: \$664\*

**Car Audio Upgrade Guide - DD Audio**

When wiring your car audio system, using the proper gauge wire for an amplifier is critical. To avoid problems and get the best sound, determine the fuse ratings of your amplifiers and their distance from the battery and refer to the following chart to determine the proper power-wire gauge. For example, if your amplifier is drawing 60 amperes of current and the distance to the car's battery from the amplifiers is 12 feet, locate where the ampere rating along the top intersects with the ...

If you're a total newbie to the world of car audio systems, then there's just one key fact that you should be aware of. It isn't some byzantine formula that's used to calculate speaker power levels or optimal speaker placements. It doesn't have anything to do with squeezing every last bit out of a car audio capacitor or adding an additional battery.

If you drive a compact coupe or hatchback, a sports car, or a small-cab pickup, for instance, an amp that's 50-watts RMS per channel, or smaller will probably do fine, overcoming road noises and adding clarity to your music. Look for speakers with a top RMS rating of at least 50 watts RMS to go along with the amp.

A good amplifier wiring kit like NVX True Spec 4 Gauge 100% Copper Single Amp Wiring Kit with Speaker Cable, No RCA [XAPK4]. includes a fuse, fuse holder, subwoofer speaker wire, power cables, remote wire, zip ties, RCA cables, ring terminals, and cool accessories.. They make your installation MUCH easier and help you avoid paying outrageous prices from local shops.

**How To Install A Subwoofer And Subwoofer Amp In Your Car ...**

In-home audio setups, clipping is typically caused by an underpowered amp or inefficient speakers, but loose or burnt wires can introduce similar problems in cars. An amp that simply isn't powerful enough for the speaker, or speakers, you have hooked to it is the single most likely cause of clipping, in which case you'll either need to upgrade the amp or downgrade the speakers.

**Common Car Amp Problems (And How to Fix Them)**

Car stereo metal mounting straps are fantastic for installation and will make building & installing an amp rack much easier. You can buy them finished in black, which I highly recommend, or with the standard metal finish. 9" straps are fine in most cases, and you can buy a 5 pack or similar to save money.
