When global pop star Kelly Rowland became a mom for the first time, giving birth to her son Titan, she felt the most incredible love she had ever experienced. But after spending nine months so focused on the baby growing inside her, she was caught completely off guard by how much she had changed. Like many first-time moms, she was not ready for what had happened to her body and for so many overwhelming new thoughts and emotions. She

Again? Will I Ever Sleep  
Again? Are My Boobs Always  
Going to Be Like This?

Rowland had questions about everything from postpartum bleeding, skin and hair changes, and dealing with aches and pains to getting back in shape and sex after baby. She also weighed the larger notions about what she wanted out of motherhood and the rest of her life. It was a good thing that Rowland's longtime OB/GYN Dr. Tristan Emily Bickman was right there to answer every single crazy question that popped into her head. Nothing fazed Dr. Bickman and she provided Rowland

It's all just part of the "miracle" of birth. In *Whoa, Baby!* Rowland and Dr. Bickman team up to share this reassuring information with new moms everywhere. Often hilarious and always down-to-earth, Rowland and Dr. Bickman cover every surprising challenge that new moms face.

Parents are more overwhelmed than ever before -- juggling demands on their time as well as conflicting advice from family, friends, frenemies and "experts" on how to achieve parental perfection. Pediatrician Jane Scott has seen this parental anxiety up close, and in *The Confident Parent* she shares advice on how to cut through the confusion, dial down the insecurities and unhelpful advice, and simply do what countless parents around the world have done throughout history: respond to their little one's needs without

Informed by a unique global perspective, The Confident Parent shows readers how to be not just better caregivers but happier and more balanced human beings. The book covers the basics of baby and child-care from breastfeeding and sleep training to managing temper tantrums, offering a fresh perspective that's both commonsense and liberating. The way we nurture our babies, from their earliest moments, has a lifelong effect on their health and happiness. What many of us have known instinctively is now a matter of science. Study after study proves that how we hold, feed, play with and settle our babies is a major factor in their long-term wellbeing. Dr Howard Chilton has been a neonatologist (a babies' physician) for over thirty years. He has seen numerous baby-care fads come and go, but has always held to the philosophy now proved by

science: you can't give your baby too much love. In *Your Cherished Baby*, Dr Chilton introduces mothers to a complete approach for settling, feeding and engaging their 0-2 infants. He explains the neurological processes of both baby and mother in this early bonding period. He debunks the myth of baby routines, provides a compelling explanation for colic and excessive crying, and argues for the introduction of varied foods to aid the development of a child's palette and to guard against obesity later in life. Most prevalent to many a sleep-deprived parent, Dr Chilton presents a practical
