Clinical Problems in General Medicine a: Amazon.co.uk ...

Description. Clinical Problems in Medicine and Surgery is a departure from traditional medical textbooks in that it deals with the real problems of clinical medicine through scenarios encountered in the emergency department, on the wards and in outpatient clinics. First published in 1992, the book has found great popularity with medical students, residents and interns about to experience, or already experiencing, the real world of medical practice.

Clinical Problems in Medicine and Surgery - 3rd Edition

Clinical Problems in General Medicine and Surgery. July 12, 2009 by pulasena. Review "I approached this book, when asked to review it, with some scepticism. The idea of putting together the clinical experience of surgical and medical senior registrars and younger consultants was a good one, but how could it be converted into a worthwhile book ...

Clinical Problems in General Medicine and Surgery ...

Most cases of acute diarrhoea are due to infections; in immunocompetent patients these are usually self-limiting and intervention may be limited to oral rehydration if there are no signs of significant fluid loss.

These include: advanced cardiopulmonary resuscitation direct current (DC) cardioversion (a procedure to convert an abnormal heart rhythm to a normal heart rhythm) temporary cardiac pacing insertion of venous lines (peripheral and central) aspiration of fluid from chest and abdomen insertion of ...

General internal medicine | Health Careers

A general medicine doctor will send a patient for further testing if they believe surgery may be required. General medicine doctors are responsible for recording a patient's symptoms, inquiring about previous diseases, allergies and medication, and asking questions about the patient's lifestyle choices, including the abuse of cigarettes and alcohol. A comprehensive medical exam is required before any diagnosis can take place.

What Is General Medicine? (with pictures)

Background: Patients admitted to general internal medicine wards might receive a large number of drugs and be at risk for drug-related problems (DRPs) associated with increased morbidity and mortality. This study aimed to detect suboptimal drug use in internal medicine by a pharmacotherapy evaluation, to suggest treatment optimizations and to assess the acceptance and satisfaction of the prescribers.
