Danebury is an Iron Age hill fort in Hampshire, England, about 19 kilometres north-west of Winchester. The site, covering 5 hectares, was excavated by Barry Cunliffe in the 1970s. Danebury is considered a type-site for hill forts, and was important in developing the understanding of hill forts, as very few others have been so intensively excavated. Built in the 6th century BC, the fort was used for almost 500 years, during a period when the number of hill forts in Wessex greatly increased. Daneb

Danebury Iron Age Hillfort is a hilltop earthwork enclosure built about 500 BC and occupied until the coming of the Romans to Britain. It is more than just 'a hillfort'; to archaeologists you could say that Danebury is 'the' hillfort. It is a 'type-site', or model for understanding Iron Age hillforts in general. Given its importance to

# Read Online Danebury Anatomy Of An Iron Age Hillfort Batsford Studies In

Archaeology, it is understandable that Danebury is one of the most heavily studied hillforts in Britain.
