Essentials of Carbohydrate Chemistry and Biochemistry ...

Essentials of carbohydrate chemistry and biochemistry. Carbohydrates are probably nature's most common product. Plants and algae biosynthesize millions of tons of them every year. Carbohydrates are stores of energy and structural building blocks; they are versatile enough to serve as encoders of biological information and, last but not least, they are involved in recognition processes at a molecular level.

"Essentials of Carbohydrate Chemistry and Biochemistry" presents the fundamentals and important research areas within carbohydrate chemistry in a compact yet well-structured form. Since the book is anchored in the fundamentals of organic chemistry, advanced students will find the text to be quite easily understandable overall.

Book Review: Essentials of Carbohydrate Chemistry and ...

Carbohydrates are the most widely distributed naturally-occurring organic compounds on Earth. They make up much of our food, clothing and shelter, and are as vital to national economies as they are to our diet. This book is the first broad treatment of carbohydrate chemistry in many years, and presents the structures, reactions, modifications, and properties of carbohydrates.
