aesthetics, usability,
and social media and
search engine
optimization (SEO).

Aesthetics. This is the
category that most
people think of when
determining a
website evaluation
criteria.

When evaluating a Web site, ask yourself, who has written the Web site content? Are the author ' s credentials given? Think about the author ' s expertise and credibility. Knowing who wrote the content can help you determine the Web site ' s

Where To Download

trustworthiness. You may find an author whose credentials are not given on the Web site.

Evaluating Web Sites -UMGC Library

This is all about the practical consideration of what makes a good web site design, such as user-friendliness,

Where To Download

speed, security, site maps and other technical details, etc. Many of these details are not visually apparent—you will not see a website's security when typing in the URL. Even so, usability will make or break a website.
