*Feeling Unreal: Depersonalization Disorder and the Loss of ...*

"Depersonalization disorder (DPD) is a thing unto itself. It is a condition that is inherently deceptive and contradictory, and yet, the common threads of a sense of unreality and the loss of the independent, individual self usually persist throughout its duration. Its symptoms are finite, clearly defined, and delineated after a century of study.

*Feeling Unreal: Depersonalization Disorder and the Loss of ...*

Depersonalisation Disorder is the experience of feeling unreal, detached, and often, unable to feel emotion. It is a phenomenon characterised by a disruption in self-awareness and emotional numbness, where many people feel that they are disconnected or estranged from one's self. Many people experience depersonalisation during a panic attack and this is often characterised as the peak level of anxiety.

*Feeling unreal: a PET study of depersonalization disorder.*

Depersonalization & Derealization (Feeling unreal) A message from Rob: It's unfortunate that many doctors and psychotherapists do not understand this condition. It's mostly to do with the simple lack of research. Although Depersonalization Disorder (DPD) is listed as a Dissociative Disorder and sufferers do not report the same symptoms as anxiety, the reality is that DPD shares many of the same characteristics of anxiety and depression.

*Depersonalization and Derealization | Feeling Unreal*

Depersonalization-derealization disorder occurs when you persistently or repeatedly have the feeling that you're observing yourself from outside your body or you have a sense that things around you aren't real, or both. Feelings of depersonalization and derealization can be very disturbing and may feel like you're living in a dream.

The primary symptom of depersonalization disorder is a distorted perception of the body. The person might feel like he or she is a robot or in a dream. Some people might fear they are going crazy...

*Mental Health: Depersonalization Disorder*

Depersonalization, the experience of feeling disconnected from one's sense of self, is a common symptom associated with PTSD and trauma. In fact, it's so common that in the DSM-5 it is included, along with the closely related symptom of derealization, in the criteria for an Acute Stress Disorder and as a specifier for PTSD.
