~~how to use InDesign~~

InDesign is a publishing program, which means it's designed for creating 2D layouts which combine type and images. Some items you might commonly create in InDesign might include multi-page print publications like magazines and books, stationery items such as business cards and letterheads, promotional media like flyers, booklets, and brochures, and other single-page print layouts like posters and banners.

Your brand manual or style guide are the documents you need to help keep it consistent—they're key to maintaining your brand identity. Whether you're a small business, agency, or a corporation, you should have a proper document that covers all the details of the brand. Such as the design of different logos you use, the color palette, fonts used for the brand design, etc.

Ruler guides are different from grids in that they can be positioned freely on a page or on a pasteboard. InDesign users can create two kinds of ruler guides: pageguides, which appear only on the page on which they create them, or spreadguides, which span all pages and the pasteboard of a multiple-page spread. You can view ruler guides if they exist in the InDesign document or assignment file, but you cannot create them in InCopy.
