Drawing on their multidisciplinary experience as practitioners, researchers, and educators, the authors guide readers through the steps of the EBP decision-making process in assessment, treatment planning, and evaluation. The book places special emphasis on balancing clinical expertise, research results, and client needs, and analyzes both the strengths and limitations of the EBP model in order to give readers a more complete idea of how the method will shape their own practice. In addition, this practice-building reference: Introduces core principles of EBP and details its processes in social work Features guidelines for engaging clients in EBP and transmitting research findings Offers a range of case examples demonstrating EBP with diverse clients Addresses education and supervision issues and related controversies Includes an expanded glossary and valuable resources for use in evidence-based practice Evidence-Based Practice in Clinical Social Work is a practical resource for clinical social work professionals and educators that broadens the field and expands the healing possibilities for the

The Veterans Administration continues to play a central role in providing mental health services, but everyone in the field can do a better job helping those who've served our country. Deborah Y. Liggan, MD—who has succeeded in both civilian and Air Force military service—explores the spectrum of mental health illnesses that affect veterans and how each disorder impacts their lives and the lives of their loved ones. Topics focus specifically on veterans and include psychiatric interviewing, mood disorders, anxiety disorders, psychotic disorders, disorders of cognition, recovery from mental illness, and psychiatric emergencies. With clear and concise language, the guide explores how to respond to complaints such as depression, suicide, and psychotic thought processes. At the conclusion of each chapter are ten study questions of self-examination for review. The Veteran's Guide to Psychiatry is the definitive guide for psychiatrist residents, psychologists, psychiatric social workers, and anyone involved in diagnosing and treating emotional illnesses.
