The immense power the Catholic Church once wielded in Ireland has considerably diminished over the last fifty years. During the same period the Irish state has pursued new economic and social development goals by wooing foreign investors and throwing the state's lot in with an ever-widening European integration project. How a less powerful church and a more assertive state related to one another during the key third quarter of the twentieth century is the subject of this book. Drawing on newly available material, it looks at how social science, which had been a church monopoly, was taken over and bent to new purposes by politicians and civil servants. This case study casts new light on wider processes of change, and the story features a strong and somewhat surprising cast of characters ranging from Sean Lemass and T.K. Whitaker to Archbishop John Charles McQuaid and Father Denis Fahey.

Study & Master Agricultural Sciences Grade 12 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Agricultural Sciences.

Among the Second Series of The Papers of Thomas Jefferson, this volume has the most detailed coverage of his day-to-day life. These disciplined records of personal expenditures, and of various other daily observations, furnish valuable information about prices and availability of commodities of the period and provide abundant evidence of Jefferson's devotion to a systematic way of living and of his insatiable curiosity. Originally published in 1997.
