Neuromarketing has sparked great interest from brands and researchers, and also from everybody interested in marketing and consumer behavior. However, it can be sometimes difficult to find high quality sources of information to consult. We have carefully selected some scientific journals for consultation, and summarized some standard procedures to identify these resources.

7 Journals to find neuromarketing research papers | Bitbrain

Eye-tracking (Eye-tracking in neuromarketing) Eye tracking (ET) is a technique that measures and registers eye movements to identify the position of the pupil by utilizing infrared light (which is completely innocuous). Otherwise speaking, it follows the eye movements and registers gaze patterns of the participants.

Neuromarketing International Edition - h2opalermo.it

The term neuromarketing refers to the use of modern brain science to measure the impact of marketing and advertising on consumers. For decades, marketers have sought to understand what consumers were thinking, but they've relied on traditional techniques - asking them what they thought in focus groups and surveys. Neuromarketing techniques are based on scientific [1]
