Sharepoint 2010 Document Sets Vs SharePoint Document Sets Vs Folder in SharePoint 2013/2016 or SharePoint Online. Microsoft introduced document set in SharePoint 2013 where you can store related documents together as a group. Behind the scene, a document sets is a content type that you can add to a SharePoint document library.

Sharepoint 2010 Document Sets Vs Folders

SP2010 supports both folders and document sets, but why are both concepts supported, i.e. in what significant ways do they differ from the use-case perspective? Google has revealed seemingly arbitrary differences like "document sets can't be nested" while folders can. Both support information management policies, both can have custom metadata (although folders seem to require some more clicking to do it), both can have custom permissions ...

2010 - When should document sets be used instead of ...

Document sets are not available in SharePoint Foundation 2010 while folders are available. Document sets can be created only in document libraries, whereas folders can be created in either libraries or lists. Folders are not allowed within document sets. Normally to store related documents inside a document library, we usually create folders inside the document library in SharePoint 2010/2013/Online.

SharePoint Document Sets Vs Folder - SPGuides

Document Sets let you create a collection of related documents, and have SharePoint treat them as one unit. For example, you might collect all the items that you need for a sale - a sales contract, a bill of materials, engineering specs, and so on - and store them as the Contoso sale Document Set.

Introduction to Document Sets - SharePoint

The classic joke in SharePoint is that the debate over folder vs. metadata never ends and will probably never end. Some users prefer metadata, while others are stuck with good-old folders. However, there is one type of functionality that allows the flexibility of both. Today, I want to introduce you to the functionality of Document Sets, the magic feature that allows you... keep reading >

Document sets - the hidden gem of SharePoint - SharePoint ...

3. Find the Document Set content type you just created and select it. 4. A dd the metadata columns that it needs and order them as you would like them. 5. Select Document Set settings. 6. Add any document content types that you are anticipating that could be added to a vendor document set. You will see that the Document content type is already ...
