What is Software Requirement Specification - [SRS]? A software requirements specification (SRS) is a document that captures complete description about how the system is expected to perform. It is usually signed off at the end of requirements engineering phase. Qualities of SRS: Correct. Unambiguous. Complete. Consistent. Ranked for importance and/or stability

~~Software Requirement Specification—Tutorialspoint~~

The purpose section should summarize the entire SRS document. It's similar to the executive summary of business documents, and it sets the tone for the project. Typically, key components of this section include definitions, systems overview, and references. These help to establish important themes in the development project.
