Summary Of Cap Guidelines

Definition. Community-acquired pneumonia (CAP) is defined as pneumonia acquired outside hospital or healthcare facilities. Clinical diagnosis is based on a group of signs and symptoms related to lower respiratory tract infection with presence of fever $>38^{\circ}\text{C}$ ($>100^{\circ}\text{F}$), cough, mucopurulent sputum, pleuritic chest pain, dyspnoea, and new focal chest signs on examination such as crackles or bronchial breathing.

Community-acquired pneumonia (non COVID-19) - Symptoms ...

With respect to cultures, the guidelines 'strongly recommend' blood cultures and lower respiratory tract cultures only when there is severe CAP or if there is concern for MRSA or *P. aeruginosa*.. Additionally, severe CAP is a clinical setting where the authors provide a 'conditional' recommendation to perform urinary legionella and streptococcal antigen testing; it is conditional, most ...
