Rescuing Food For The Hungry Of New York. Napoleon may have been onto something when he noted that "an army marches on its stomach." A new study has found that hunger is a stronger motivational force than thirst, anxiety, fear, and social needs. A team led by researchers from the National Institutes of Health found hunger to be the most important motivational force in mice.

The Evolution Of Hunger: Motivation To Eat Is More ...

This transition underlies the expensive tissue hypothesis (Suburu 2013), which links changes in diet to evolution of the human brain. The hypothesis is that the brain and gut tissue both require lots of energy, so as our brains became larger, the gut size became smaller.

DRIVING FORCE – Now you ' re getting somewhere

Natural selection Natural selection was found to be the major driving force of evolution with an increase in fitness of the individual. Some genotypes are adaptive to their environmental habitats and these 'fit' individuals pass on the alleles to the subsequent generation resulting in increase of allele frequency.

Driving Forces of Evolution - Microevolution

There ' s a reason that attribute is lauded, and it turns out to have evolutionary roots. EDWARD O. WILSON. According to Pulitzer Prize-winning biologist Edward O. Wilson, groups are the driving evolutionary force of the human species. It ' s the cooperators, the team players who set aside selfish desires for the good of the group, that outcompete groups of non-cooperators and ensure their genes are passed on to future generations.

Groups are the driving force of human evolution, Wilson says
